DETAILED ACTION

1. After a Post-Allowance evaluation by the Quality Assurance Specialists, the Notice of Allowance has been withdrawn.
2. Claims 1, 3-31, 34, and 35 are pending and under consideration.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3-31, 34, and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shay et al (U.S. Pat. No. 6,015,710).

Shay et al teach a receptor recognition protein (such as the internalizing protein of the instant claims) linked to a lipid which is then linked to another peptide which modulates telomerase (col.12; claim 4; col. 16, line 60 to col. 17, line7). The lipid is between the internalizing peptide and the biologically active component. Modifying the linkage order would be an obvious modification, in the absence of evidence to the contrary.

Thus, the instantly claimed lipid compositions are obvious over the compositions taught by Shay et al.

5. No claims are allowed.
